

Call for Proposals!

Research in Mathematics Education

The IAP series, *Research in Mathematics Education*, is being revived and will focus on a broad range of issues in mathematics education at all levels. There is currently particular interest in proposals dealing with the following areas:

- Curriculum
- Assessment
- Equity in addressing diverse learners
- Research on the teaching and learning of particular content strands
- Other international issues in mathematics education

The editors are interested in high-quality proposals with both a focus on research and its applications to the teaching and learning of mathematics. To discuss possible proposal ideas, please contact one of the series editors.

Denisse R. Thompson, University of South Florida, denisse@usf.edu

Mary Ann Huntley, Cornell University, huntley@math.cornell.edu

Christine Suurtamm, University of Ottawa, Christine.Suurtamm@uottawa.ca
